

**BEST AVAILABLE COPY****Amendments to the Claims**

This listing of claims will replace all prior versions, and listings, of claims in the application.

**Listing of Claims:**

Claims 1-16 (Cancelled)

**1**  
~~17~~. (New) A method for retrieving a particular resource, the method comprising:  
 parsing a resource descriptor associated with the particular resource, the resource descriptor comprising a uniform resource identifier (URI) and a signature, wherein the signature is not a uniform resource identifier;  
 responsive to locating a candidate resource using the uniform resource identifier, confirming the candidate resource is the particular resource using the signature; and  
 responsive to failing to locate the particular resource using the uniform resource identifier, locating the particular resource, a copy of the particular resource, or another resource similar to the particular resource using the signature.

**2**  
~~18~~. (New) The method of claim ~~17~~<sup>1</sup>, wherein failure to locate the particular resource using the uniform resource identifier is a result of relocation or deletion of the particular resource from a location identified by the uniform resource identifier.

**3**  
~~19~~. (New) The method of claim ~~17~~<sup>1</sup>, wherein the signature is a search query and wherein confirming the candidate resource is the particular resource comprises:

executing the search query to compile a result set; and  
confirming the candidate resource is one of a predetermined number of top results in the result set.

<sup>4</sup>  
~~20.~~ (New) The method of claim <sup>1</sup>~~17~~, wherein confirming the candidate resource is the particular resource comprises:

generating a candidate signature from the candidate resource; and  
confirming the candidate signature matches the signature within a predetermined tolerance.

<sup>5</sup>  
~~21.~~ (New) The method of claim <sup>1</sup>~~17~~, further comprising:  
locating one or more copies of the particular resource using the signature.

<sup>6</sup>  
~~22.~~ (New) The method of claim <sup>1</sup>~~17~~, further comprising:  
locating one or more other resources similar to the particular resource using the signature.

<sup>7</sup>  
~~23.~~ (New) A computer program product comprising a computer readable medium, the computer readable medium including a computer readable program for retrieving a particular resource, wherein the computer readable program when executed on a computer causes the computer to:

parse a resource descriptor associated with the particular resource, the resource descriptor comprising a uniform resource identifier (URI) and a signature, wherein the signature is not a uniform resource identifier;

responsive to locating a candidate resource using the uniform resource identifier, confirm the candidate resource is the particular resource using the signature; and

responsive to failing to locate the particular resource using the uniform resource identifier, locate the particular resource, a copy of the particular resource, or another resource similar to the particular resource using the signature.

<sup>8</sup>  
~~24.~~ (New) The computer program product of claim <sup>7</sup>~~23~~, wherein failure to locate the particular resource using the uniform resource identifier is a result of relocation or deletion of the particular resource from a location identified by the uniform resource identifier.

<sup>9</sup>  
~~25.~~ (New) The computer program product of claim <sup>7</sup>~~23~~, wherein the signature is a search query and wherein confirm the candidate resource is the particular resource comprises:

execute the search query to compile a result set; and

confirm the candidate resource is one of a predetermined number of top results in the result set.

<sup>10</sup>  
~~26.~~ (New) The computer program product of claim <sup>7</sup>~~23~~, wherein confirm the candidate resource is the particular resource comprises:

generate a candidate signature from the candidate resource; and

confirm the candidate signature matches the signature within a predetermined tolerance.

<sup>11</sup>  
~~27.~~ (New) The computer program product of claim <sup>7</sup>~~23~~, wherein the computer readable program when executed on the computer further causes the computer to:

locate one or more copies of the particular resource using the signature.

<sup>12</sup>  
~~28~~. (New) The computer program product of claim <sup>7</sup>~~23~~, wherein the computer readable program when executed on the computer further causes the computer to:

locate one or more other resources similar to the particular resource using the signature.

<sup>13</sup>  
~~29~~. (New) An apparatus for retrieving a particular resource, the apparatus comprising:  
means for parsing a resource descriptor associated with the particular resource, the resource descriptor comprising a uniform resource identifier (URI) and a signature, wherein the signature is not a uniform resource identifier;

responsive to locating a candidate resource using the uniform resource identifier, means for confirming the candidate resource is the particular resource using the signature; and

responsive to failing to locate the particular resource using the uniform resource identifier, means for locating the particular resource, a copy of the particular resource, or another resource similar to the particular resource using the signature;

<sup>14</sup>  
~~30~~. (New) The apparatus of claim <sup>13</sup>~~29~~, wherein failure to locate the particular resource using the uniform resource identifier is a result of relocation or deletion of the particular resource from a location identified by the uniform resource identifier.

<sup>15</sup>  
~~31~~. (New) The apparatus of claim <sup>13</sup>~~29~~, wherein the signature is a search query and wherein means for confirming the candidate resource is the particular resource comprises:

means for executing the search query to compile a result set; and

means for confirming the candidate resource is one of a predetermined number of top results in the result set.

<sup>16</sup>  
~~32.~~ (New) The apparatus of claim <sup>13</sup>~~29~~, wherein means for confirming the candidate resource is the particular resource comprises:

means for generating a candidate signature from the candidate resource; and

means for confirming the candidate signature matches the signature within a predetermined tolerance.

<sup>17</sup>  
~~33.~~ (New) The apparatus of claim <sup>13</sup>~~29~~, further comprising:

means for locating one or more copies of the particular resource using the signature.

<sup>18</sup>  
~~34.~~ (New) The apparatus of claim <sup>13</sup>~~29~~, further comprising:

means for locating one or more other resources similar to the particular resource using the signature.

**BEST AVAILABLE IMAGES**

Defective images within this document are accurate representations of the original documents submitted by the applicant.

Defects in the images include but are not limited to the items checked:

- ☐ BLACK BORDERS
- ☐ IMAGE CUT OFF AT TOP, BOTTOM OR SIDES
- ☐ FADED TEXT OR DRAWING
- ☐ BLURRED OR ILLEGIBLE TEXT OR DRAWING
- ☐ SKEWED/SLANTED IMAGES
- ☐ COLOR OR BLACK AND WHITE PHOTOGRAPHS
- ☐ GRAY SCALE DOCUMENTS
- ☐ LINES OR MARKS ON ORIGINAL DOCUMENT
- ☐ REFERENCE(S) OR EXHIBIT(S) SUBMITTED ARE POOR QUALITY
- ☐ OTHER: \_\_\_\_\_

**IMAGES ARE BEST AVAILABLE COPY.**

**As rescanning these documents will not correct the image problems checked, please do not report these problems to the IFW Image Problem Mailbox.**
